

YOUR DIGITAL ECOSYSTEM FOR SUPERIOR STRATEGY EXECUTION

Advanced Digitization

EVOLUTIONIZER is committed to building the world's first and best system for augmentation of leadership processes and agile talenting. We enable organizations to achieve superior results – developing peoples' and companies' full potential. Our software helps businesses all over the world to close their strategy execution gap.

We are a highly innovative software company creating B2B solutions – working on products that leave classic approaches in system support far behind, conquer new application territories and inspire our customers.

EVOLUTIONIZER always has instant opportunities for extraordinary talented people who want to make an impact that excels in user perception, in our company's footprint and in the industry.

For our location in Düsseldorf, Germany, we are looking for:

Junior Software Developer

C# / .NET – BACK END

EVOLUTIONIZER

Your impact:

- Develop dynamic, scalable data models and business-layers in a top competent core team.
- Develop augmented intelligence-systems based on machine learning.
- Develop interfaces and APIs to existing systems and external services.
- Implement most advanced communication protocols (eg SignalR) to back end in close co-operation with the front end team.
- Co-ordination and documentation of development within the team

Experience/Skills required:

- Passion to program – lateral entrants welcome.
- Profound education in software development – currently in education or career entrant.
- Distinct analytical skills – methodical and structured way of working.
- Communicative, loving to interact with people, able to work in a team.
- Able to work independently, extreme user-orientation.

Knowledge required– at least one very solid:

- **.Net C#**
- Entity Framework
- **SQL**
- **ASPNet**
- **WebAPI**
- Typescript
- Javascript
- Angular
- HTML+CSS
- LESS

If you currently work as freelancer with relevant qualifications we'd love to talk to you as well with common perspective of a *friendly takeover*.

We work in creative and dynamic teams based on issues and agile methods. We work together, not against each other. *Bringing out the best in others* is our key motivation. Be it corporates we serve with our software, be it ourselves in supporting our strengths and benefitting from our heterogeneous team and talents. We encourage diversity of thoughts and friendly disagreement – and yet, no day has passed, on which we have not seen that our common spirit of mutual appreciation has produced extraordinary thoughts or solutions that will help our clients and ourselves to achieve even most ambitious goals.

Please submit your resume today to:
